Portfolio

EDUCATION

Bachelor of Engineering in Computer Science & Engineering

2024 – 2027

The Maharaja Sayajirao University of Baroda, Vadodara

Diploma in Computer Engineering

2021 – 2024

Government Polytechnic, Jamnagar (GTU)

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, Java, Python, SQL, C, C#

Databases

MongoDB, PostgreSQL, MySQL, Redis, SQLite, MS SQL Server

Frameworks & Libraries

React.js, Next.js, Node.js, Express.js, Redux, Tailwind CSS, React Native

DevOps & Tools

Git, GitHub, Docker, Postman, CI/CD

Core

DSA, OOP, Clean Architecture, System Design

PROJECTS

InterviewOS — Real-Time Collaborative Interview Platform

GitHub

Live

React.js, Node.js, MongoDB, WebRTC, Socket.IO, Y.js, Judge0, Monaco Editor

- Architected a scalable real-time platform with WebRTC P2P video, Y.js CRDT collaborative editor, shared whiteboard, and room-scoped Socket.IO for concurrent interview sessions.
- Integrated Judge0 API for sandboxed code execution across 7+ languages in Monaco Editor and built a robust proctoring system (tab-switch detection, paste prevention, 3-strike termination) — no third-party SDK.
- Designed modular room architecture with JWT authentication, role-based access control, and real-time state synchronization.

Outly — AI-Powered Career Automation System

GitHub

React.js, Node.js, Gmail API, Redis, Bull Queue, GPT-4, OAuth 2.0

- Built end-to-end LLM pipeline using GPT-4 to research companies from CSV, generate personalized cold emails, and auto-save as Gmail drafts via Gmail API + OAuth 2.0.
- Developed AI Resume Tailor that scores JD compatibility and used Bull Queue + Redis for distributed, rate-limited, fault-tolerant job processing.
- Implemented AI content scheduler for LinkedIn & Twitter posts with Telegram Bot integration and automated queue management.

EXPERIENCE

Software Development Intern

Jul 2023 – Sep 2023

YV Thinkers

- Built a full-stack CRM using MERN stack serving both Admin and Customer-facing workflows, with scalable REST APIs for order tracking, data management, and concurrent request handling.
- Implemented role-based JWT authentication with dual-token strategy and enforced SOLID principles with clean architecture — ensuring maintainable, team-reviewable codebase.
- Automated customer record lifecycle using MongoDB aggregation pipelines, reducing manual data entry by 60% across core CRM workflows.
